

product active and safe cleaning for user

use

Toplimpa Bio is a cleaner specifically designed for cleaning concrete and cement residue on: vehicles, concrete mixers, tools, walls lined with ceramic brick facings, natural stone, exposed surfaces in pre-industrial concrete mix.

Product indicated for the first cleaning of the work (bathrooms, kitchens), in order to remove residual cement.

Biodegradable product and easy to apply..

The Toplimpa Bio becomes active in the presence of cementitious waste, without the release of its activity immediately as with other products made from strong acids.

It contains no organic solvents or heavy metals and is phosphate free.

surface

- Mixers;
- Tools;
- Concrete pumps;
- Brick walls;
- Floors and walls
